Comparison by recorded airport fee

| Recorded airport fee     | Total trips | Mean amount per trip | Mean distance (miles) | Mean duration (min) |
|--------------------------|-------------|----------------------|-----------------------|---------------------|
| Positive recorded fee    | 3.163.100   | \$76,41              | 13,23                 | 38,35               |
| No positive recorded fee | 36.514.778  | \$24,49              | 2,57                  | 15,06               |
| Total                    | 39.677.878  | \$28,63              | 3,42                  | 16,91               |

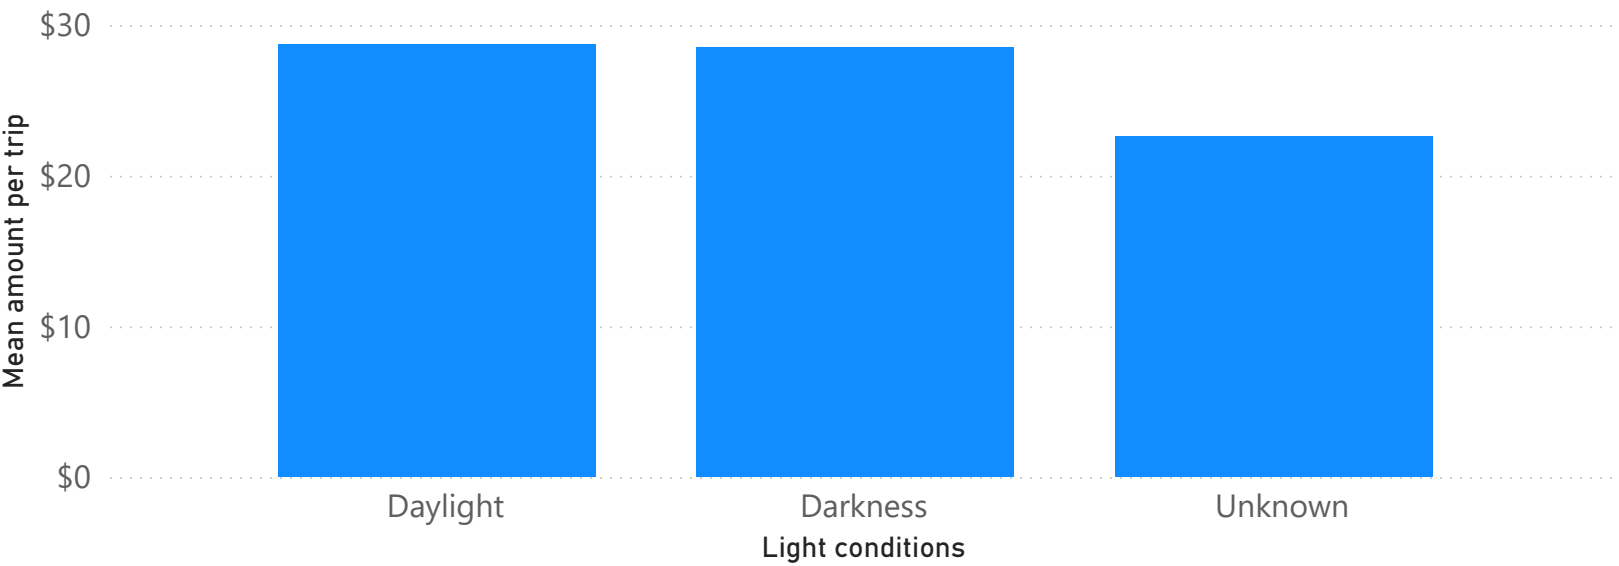

Airport pickup x recorded fee - trips

| Pickup type          | No positive recorded fee | Positive recorded fee | Total      |
|----------------------|--------------------------|-----------------------|------------|
| Airport-zone pickup  | 103.604                  | 3.026.711             | 3.130.315  |
| Outside airport zone | 36.411.174               | 136.389               | 36.547.563 |
| Total                | 36.514.778               | 3.163.100             | 39.677.878 |

Trips per real hour - light conditions

Mean amount (USD) - light conditions

A positive Airport\_fee defines the recorded-fee group; zones 1, 132 and 138 define airport pickups. Recorded amounts are not profit. Light conditions come from the weather data.
